# TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Highlights . . . . .	3
1. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, December . . . . .	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-December averages . . . . .	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, December . . . . .	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, December . . . . .	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-December . . . . .	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, November, with comparisons . . . . .	14
7. Federal milk order Class I formula price information, December . . . . .	18
8. Prices and economic indexes used in Federal milk order formulas to determine December prices, with comparisons . . . . .	20
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, December . . . . .	21
9a. Seasonal incentive fund included under various Federal milk orders, December . . . . .	21
Major order actions, December . . . . .	22

FEDERAL MILK ORDER MARKET STATISTICS

Highlights

DECEMBER 1967

Producer Deliveries. A total of 122,991 producers delivered 3.9 billion pounds of milk to regulated handlers in 66 comparable markets during December 1967. This is 1.3 percent below producer deliveries in December 1966. Average daily delivery per producer increased from 990 pounds in December 1966 to 1,016 pounds in December of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 66 markets decreased 2.4 percent from last year, to a total of 2.6 billion pounds for the month of December 1967. This is the fifteenth consecutive month in which producer deliveries used in Class I in comparable markets has been below that for the corresponding month a year ago. At least part of the decrease in December's Class I sales is explained by the fact that there were five Sundays in December 1967 as compared to four during the previous December. Very little milk is sold by handlers on Sunday.

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 2.2 percent in the 66 markets for the month of December.

Percentage of Producer Deliveries Used in Class I. The average utilization percentage for December was 68 percent, the same as last year. Twenty-one markets showed an increase in the utilization percentage, 3 showed no change, and the remaining 42 markets showed a decrease (See table 4).

Minimum Prices. The weighted average Class I price paid by handlers in the 66 markets for 3.5 percent milk was \$6.00 per hundredweight, 4 cents lower than the \$6.04 per hundredweight price in December 1966. Minimum Class I prices for December were higher in 17 markets and lower in the remaining 49 markets.

Producers in the 66 markets received a weighted average blend price of \$5.40 per hundredweight for 3.5 percent milk, five cents lower than the \$5.45 price received by producers in December 1966. Producers received higher blend prices in 21 markets, the same in one market, and a lower price in the remaining 44 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for December 1967 in 67 marketing areas are estimated to be about 2.2 billion pounds, 2.6 percent below such sales in December of last year. Complete November in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

ANNUAL - 1967

Minimum Prices. The weighted average Class I price in 1967 for the 66 markets was \$5.94, 29 cents higher than the \$5.65 price in 1966. The 1967 weighted average blend price was \$5.23, 21 cents higher than the blend price of \$5.02 reported for 1966 (See table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. For the year 1967, compared to 1966, producer deliveries for the 66 markets were up 0.5 percent, and deliveries used in Class I were down 2.5 percent. Data for the 66 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-December

Markets	Producer Deliveries			Deliveries used in Class I		
	1967	Change from 1966		1967	Change from 1966	
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
66 Comparable markets 1/	47,669,354	+232,300	+ 0.5	30,673,089	-779,878	- 2.5
7 Non-comparable markets 2/	6,041,769	+2,250,733		3,734,414	+1,213,720	
74 All markets 3/	53,711,123	4/+699,029	+ 1.3	34,407,503	4/-397,235	- 1.1

1/ Markets under continuous regulation since January 1, 1966, which have had no significant marketing area expansion.

2/ Upper Florida, Milwaukee, Rock River Valley, Northwestern Indiana, Southern Illinois, Central Illinois, and Minnesota-North Dakota.

3/ Excludes Sioux City.

4/ Includes 1,784,004 thousand pounds of producer receipts and 831,077 thousand pounds of Class I for the Chicago market, January-April 1966.

1/ Markets under regulation on January 1, 1966, and which have had no significant marketing area expansions. Excludes Upper Florida, Milwaukee, Rock River Valley, Northwestern Indiana, Southern Illinois, Central Illinois, Sioux City, and Minnesota-North Dakota.

2/ Class I plus Class II = 5,749,811 thousand pounds in 1967 and 6,091,939 thousand pounds in 1966; utilization = 54% in 1967 and 54% in 1966. It is estimated that reported Class I sales were reduced by about 121,861 thousand pounds in 1967, due to milk standardization by handlers.

3/ Fewer than three handlers.

4/ Excludes Sioux City.

5/ Includes 1,784,004 thousand pounds regulated under the Chicago order, January-April.

6/ Includes 831,077 thousand pounds regulated under the Chicago order, January-April.

Massachusetts-R. I.-N. H.					

Amendments:

Connecticut - December 1 (32 FR 15090, 11/1/67). Handler definition is revised to include a cooperative association with respect to producer-member milk which is delivered from the farm to pool plants in bulk tank trucks, unless the receiving plant accepts farm weights and tests as a condition of being the handler. Amendment allows producer-handlers to purchase nonfat solids for fortification. A supply plant must ship at least 15 percent of its receipts from producers and cooperative associations to pool distributing plants during the month of July and 25 percent during each of the months of August through November. The provision for automatic pool plant qualification remains the same.

The Class I price level through April 1968 is fixed at \$6.79 in the nearby plant zone. Other changes were made in the Class I price formula. The plant zone differential rate for the Class I and basic uniform price were lowered seven cents. The plant zone differential rate between the 21st zone and the nearby zone is reduced from 47 cents to 40 cents. Action also exempts governmental agencies from regulation.

Indianapolis - December 1 (32 FR 16389, 11/30/67). Action eliminates minus location adjustments at plants located in the State of Ohio.

Massachusetts-Rhode Island-New Hampshire - December 1 (32 FR 15076, 11/1/67). Marketing area expanded by adding the remainder of Essex County, Massachusetts; the New Hampshire counties of Belknap, Hillsboro, Merrimack, Rockingham and Strafford; the towns of Ashland, Bridgewater, Bristol, Holderness, and Plymouth in Grafton County, New Hampshire; and, the towns of Dublin, Jaffrey, Harrisville, Nelson, Marlboro, Roxbury, Sullivan, and Keene City in Cheshire County, New Hampshire. The expanded area is redesignated "Massachusetts-Rhode Island-New Hampshire." Population (1960 Census) 6,040,558.

Handler definition is revised to include a cooperative association with respect to producer-member milk which is delivered from the farm to pool plants in bulk tank trucks, unless the receiving plant accepts farm weights and tests as a condition of being the handler. A dairy farmer whose milk is diverted from a pool plant or by a cooperative association handler under this order to a plant regulated under another Federal order will not be a "producer" under the Massachusetts-Rhode Island-New Hampshire order with respect to the milk so moved if any of the "diverted milk" is assigned to Class I under the other order and if all of the dairy farmer's milk so moved is treated as producer milk under the other order.

A supply plant must ship at least 15 percent of its receipts from producers and cooperative associations to pool distributing plants during the month of July and 25 percent during each of the months of August through November. The provision for automatic pool plant qualification remains the same. Action permits a cooperative association acting as handler on member bulk tank milk to include such milk as part of the receipts and qualifying shipments of its supply-plant system. Definition revised to deny pool plant status to any plant handling milk subject to a commitment limiting its availability for Class I use.

Amendment action would price milk diverted from a pool plant located within the first 14 zones to a plant located beyond Zone 14 at the location of the receiving plant. Action provides for assignment of other order bulk milk (not requested Class II) to the lower of the estimated market average utilization or the handler's utilization of producer milk. Action also removes the special exemption for certified milk.

Amendment establishes a fixed Class I price, through April 1968, of \$6.39 (Zone 21). The blend price is to be announced on the 13th day of the month instead of the 12th. Action adjusts the area off the nearby zone and revises the application of zone differentials. The differentials for plants in Zone 15 and beyond remain unchanged, but the differentials for nearer zones are changed. The plant zone differential rate between the 21st zone and the nearby zone is reduced from 47 cents to 40 cents. Action provides a pool obligation for other order plants which distribute Class I milk in the marketing area if such milk is not classified and priced under the other order.

Suspensions:

Kansas City - December 1 (32 FR 16390, 11/30/67). Action suspends the supply-demand adjustor to the Class I price for the months of December 1967 and January 1968.

Mississippi - December 1 (32 FR 16527, 12/2/67). Action suspends the supply-demand adjustor to the Class I price for the months of December 1967 and January 1968.

New Orleans - December 1 (32 FR 16527, 12/2/67). Action suspends the supply-demand adjustor to the Class I price for the months of December 1967 and January 1968.

North Texas and Oklahoma Metropolitan - December 1 (32 FR 16480, 12/1/67). Action suspends the supply-demand adjustors to the Class I prices in these orders for the months of December 1967 and January 1968. The Red River Valley, Austin-Waco, Corpus Christi, Central West Texas, Lubbock-Plainview, and San Antonio markets are similarly affected since their prices are based on either the North Texas or Oklahoma Metropolitan Class I price.

St. Louis - December 1 (32 FR 16479, 12/1/67). Action suspends the supply-demand adjustment to the Class I price for the months of December 1967 and January 1968. The Ozarks, Paducah, and Southern Illinois markets are similarly affected since their prices are based on the St. Louis Class I price.

Wichita - December 1 (32 FR 16480, 12/1/67). Action suspends the effect of the supply-demand adjustor to the Class I price of the order for the months of December 1967 and January 1968.

ERRATA

The following suspension action was inadvertently  
omitted from the "Major Order Actions"  
for November 1967

Suspension:

Eastern Colorado - November 1 (32 FR 15431, 11/4/67). Action suspends the supply-demand adjustor to the Class I price for the months of November and December 1967, and January 1968. The Western Colorado market is similarly affected since its price is based on the Eastern Colorado Class I price.
